

The Big Buildingguide

Why Quarneval?

Building the Quarneval is something that all students should do at some time. Not only because of how incredibly fun it is to participate in the Quarneval itself, but also for everything that comes with it. Building Quarneval is fun, easy and brings memories for life!

The most important days of the Quarnevalspring

Dates to remember this spring:

February 4 - MelodifestiValen

February 10- The big sketchpub

March 3 - Last day for submission!

March 24 - Presentationpub

April 6- BRUXrelease

How do you participate?

1. Gather a team

The team can consist of anyone, friends from the student association, your class or other schools. Being over 18 is the only requirement.

2. Choose Quaptain and First Mate

These two will have the major responsibility for the team and the construction of the float.

3. Register your team at Bygga.re

At Bygga.re, Quaptain and First Mate will register all information about the team and the float. The recommended number of builders is at least 10, up to 50.

4. Draw your float

When you have finished the design of your float, Quaptain and First Mate will post it on Bygga.re. Here you can fill out what materials you will need, a construction plan for the week and a drawing of the float. Quarnevalen provides you with some standard materials that can be viewed at Bygga.re, but you may also specify other materials that you would like, and we will confirm if we can offer those materials or not. As a team, you can also fix some materials yourself.

May 6 - Opening of the Buildingsite

May 5 - Opening of the Öltält

May 13 14:08 - Quarnevalen

Float categories

Floats will be divided into different categories. Think about which category your contribution

Platform carried floats

These floats are built on some form of foundation and will be lifted on top of the truck platforms on the day of Quarnevalen. The float should then stay within the dimensions of 2.5m X 8.0m X 3.0m (width X length X height) size.

Walking

As stated, the walking contributions walk by foot.

Non-motorized

Floats in this class have in common that they travel by wheels but lack motor.

Motorized

This float category includes all floats that run by their own. Keep in mind that if your contribution requires difficult-to-find special items, the chance of being able to participate is increased if you yourself have the opportunity to obtain some of these items.

The Building site

The building site is Quarnevalen's most eventful place! Here you will spend many hours building your float, drinking beer and hanging out with new and old friends!

Opening hours

The building site opens on May 6th and will remain open until Quarnevalen on May 13th. Opening hours are 06: 08-18: 08.

Do I have to fix materials myself?

No, you just need to fill out what you want on bygga.re and we will solve the rest.

Is the buildingbeer free of charge?

Of course!

Wood

The majority of the material used to build floats is wood. Floats that are built in wood can be loaded on trucks, walked by foot, or travel with or without an engine. Only your imagination set the limits!

Tools

Everyone who builds a float has access to a variety of tools at the building site, ranging from power tools to various hand tools. You will be able to borrow tools at the tool station.

Platform carried floats

The floats that are not automotive will be lifted onto a truck platform. These are then driven by drivers through the Quarneval while your team is on the platform. In terms of size, the contribution must remain within the limits 2.5m X 8.0m X 3.0m (width X length X height).

Steel

Many floats also require the use of steel. These can be loaded on trucks, walked by foot, or travel with or without motor. Only your imagination set the limits!

Tools

In addition to various hand tools, you also have access to welds of various kinds, as well as more powerful electric tools. You will be able to borrow everything you need from the tool station.

Specialmaterials

Do you need something that is not in the standardmateriallist? Contact us to find out what we can possibly solve in addition to the standard materials!

Walking

If you feel like participating but not building, there is the possibility of organizing other theatrical contributions. This can be anything from walking as an orchestra to making your own mardigras!

Clothing and spex

A note on steel and wood floats, is that some builders may walk along the float through Quarnevalen. Dress according to your theme!

Standardmaterials

Quarnevalen provides you with a lot of standard materials that all teams have access to. If you need any extra material beyond this, specify it in the submission portal.

Trä/Wood

Virke 1"x2"/Softwood 1"x2"

Virke 1"x4"/Softwood 1"x4"

Oljefat/Oil Drum

Silvertejp/Duct Tape

Quaptain and First Mate

Quaptain and First Mate are responsible for their entire team. These are the two people who will have the closest contact with Staben, but first of all Tågstyret. During the spring, there are some extra dates that Quaptain and the First Mate need to keep track of.

Final Submission 3/3

Now all members of the team must be registered and the float drawings submitted on the website!

Presentationpub 24/3

Here you will find out if your float qualified or not!

QM1 and QM2

Two info meetings for all Quaptains and First Mates. Will be held at the end of March and the end of April. Here you get all the important information about building floats, building site security and extra activities related to the week of Quarnevalen.

Qs-fest!

Obviously, those who work extra hard should get paid for the effort. The staff organizes a party for all Quaptains and First Mates where we invite you to a fun party in genuine Q-spirit!

I don't know what to draw!

Want to join but don't know what to build? There are no stupid ideas! The contributions have historically been a mixture of contemporary satire, beautiful floats in papier-mache and wood or more advanced contributions in steel. Your imagination is the limit!

FAQ

What are the dates?

The buildingsite is open between
6/5 - 13/5

What times is the buildingsite open?

06:08-18:08

What does it cost?

The buildingfee is 2500kr per person, however, you have the opportunity to get your money back when you sell our popular BRUXanvisningen.

What is BRUX?

BRUXanvisningen is Quarnevalens very own newspaper. Filled with studentikosa texts and satire, it has become a well-known feature of Stockholmers' Quarnevalspring.

Is the buildingbeer free of charge?

Of course!

Do I have to fix materials myself?

No, you just need to fill out what you want on bygga.re and we will solve the rest.
